Installation Manual Guide For Insulcon Pre-Rendered Panels

Atpolywell Pty Ltd
Pre-Rendered Polypanels
“R” Values

40mm Thick Panels	1.40R Value
60mm Thick Panels	1.90R Value
75mm Thick Panels	2.40R Value

The R value or thermal resistance of a material expresses the ability of a particular thickness of those materials to resist temperature flow.

The definition of R value is the reciprocal of the materials conductive R value. The R value refers to the thermal resistance of a building, or assembly of building materials, and is the means of calculating the overall thermal resistance of a building section.
